Cell structure worksheet

Biology 9 - Unit 2: Cells and organisation

1. Label the animal cell: nucleus, cytoplasm, cell membrane, mitochondria, ribosomes.
2. Label the plant cell: as above, plus cell wall, chloroplasts and the vacuole.
3. Which three parts are found in plant cells but not animal cells?
4. What is the job of the nucleus?
5. Where does respiration happen in the cell?
6. Explain why root hair cells have no chloroplasts.
7. Explain how the cell membrane controls what enters the cell.
8. Compare a bacterial cell with an animal cell. Give two differences.

Use full sentences for questions 6 to 8.
