Quadratics problem set

Maths 9 - Show your working for every question

1. Solve x^2 - 5x + 6 = 0
2. Solve x^2 + 7x + 12 = 0
3. Solve 2x^2 - 8 = 0
4. Factorise x^2 - 9x + 20
5. Solve x^2 = 3x + 10
6. Solve x^2 - 4x - 21 = 0
7. Find the roots of y = x^2 - 2x - 15
8. Solve 3x^2 + 5x - 2 = 0
9. A rectangle is x cm by (x + 3) cm and has area 40 cm^2. Find x.
10. (Stretch) Show that x^2 + 4x + 7 = 0 has no real roots.
11. (Stretch) Find k so that x^2 + kx + 9 = 0 has one repeated root.
12. (Stretch) Solve x^4 - 13x^2 + 36 = 0
